**100%  
FoamFree**

As well as being sustainable and 100% recyclable, **Aerofibre is 100% foam free**, so you can be assured that this mattress is completely **free of harmful chemicals and VOC's**.

Made in the UK

Recyclable Aerofibre

Roll packed

The JAY-BE® Toddler Foam-Free mattress offers the essential ingredients needed to give your toddler a comfortable night.

At its core, this JAY-BE® Toddler mattress is constructed with a medium firmness spring to offer evenly distributed support while they sleep. To prevent spring feel, the spring is topped with a high-density (HD) insulator pad and a cushion of Aerofibre comfort layers.

Engineered from recycled plastic bottles and sustainable fibres, the comfort layers are 100% recyclable and offer substantial support for growing bones and muscles. The Aerofibre comfort layers are hypoallergenic and unlike

foam have an open cell structure which allows the free flow of air through the mattress, reducing moisture build up and in turn helping to prohibit mould and allergens. As a result, a more comfortable and temperature-controlled sleeping environment is experienced. Jay-Be® Aerofibre is also free from VOC's and harmful chemicals.

For even more cosiness, the JAY-BE® Toddler Foam Free mattress is finished in a durable and soft woven fabric.

All JAY-BE® Toddler mattresses are backed by a five-year manufacturer's guarantee. Roll-packed for your complete convenience.
