

Waterproof sprung mattress

Key Features

Better than waterproof! A waterproof mattress, which is anti-microbial and anti-bacterial

Hypoallergenic and easy to wipe clean for a healthier sleeping environment

Foam Free comfort layers, free from harmful chemicals

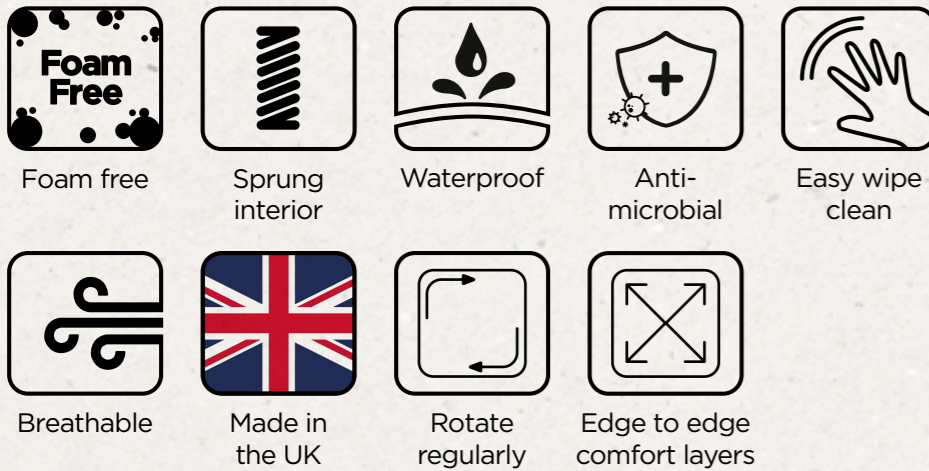

Breathable Aerofibre comfort layers help to create a temperature controlled sleeping environment for a drier and fresher mattress

Sprung interior for evenly distributed posture support

Easy care - simply rotate regularly to maximise the life of the mattress

Edge to Edge comfort layers for maximum sleeping area

Made in the UK to meet British and European safety standards

Care instructions

Routine soap and warm water sponging is effective for ordinary use. Fresh stains, both water and oil based are easily removed using most water based household spray cleaning agents. A half cup of bleach for 5 litres of water can also be used as a useful disinfectant. Best cleaning method is 'wipe and dry' technique.

Product code

803600

Product & Packaging Dimensions*

Mattress ready for use: W70cm (27.5in) L140cm (55in) D10cm (3.9in)

Mattress packed: W30cm (11.8in) L30cm (11.8in) H80cm (31.5in) (0.072m³)

Weight: 6.6kg / 14.6lb

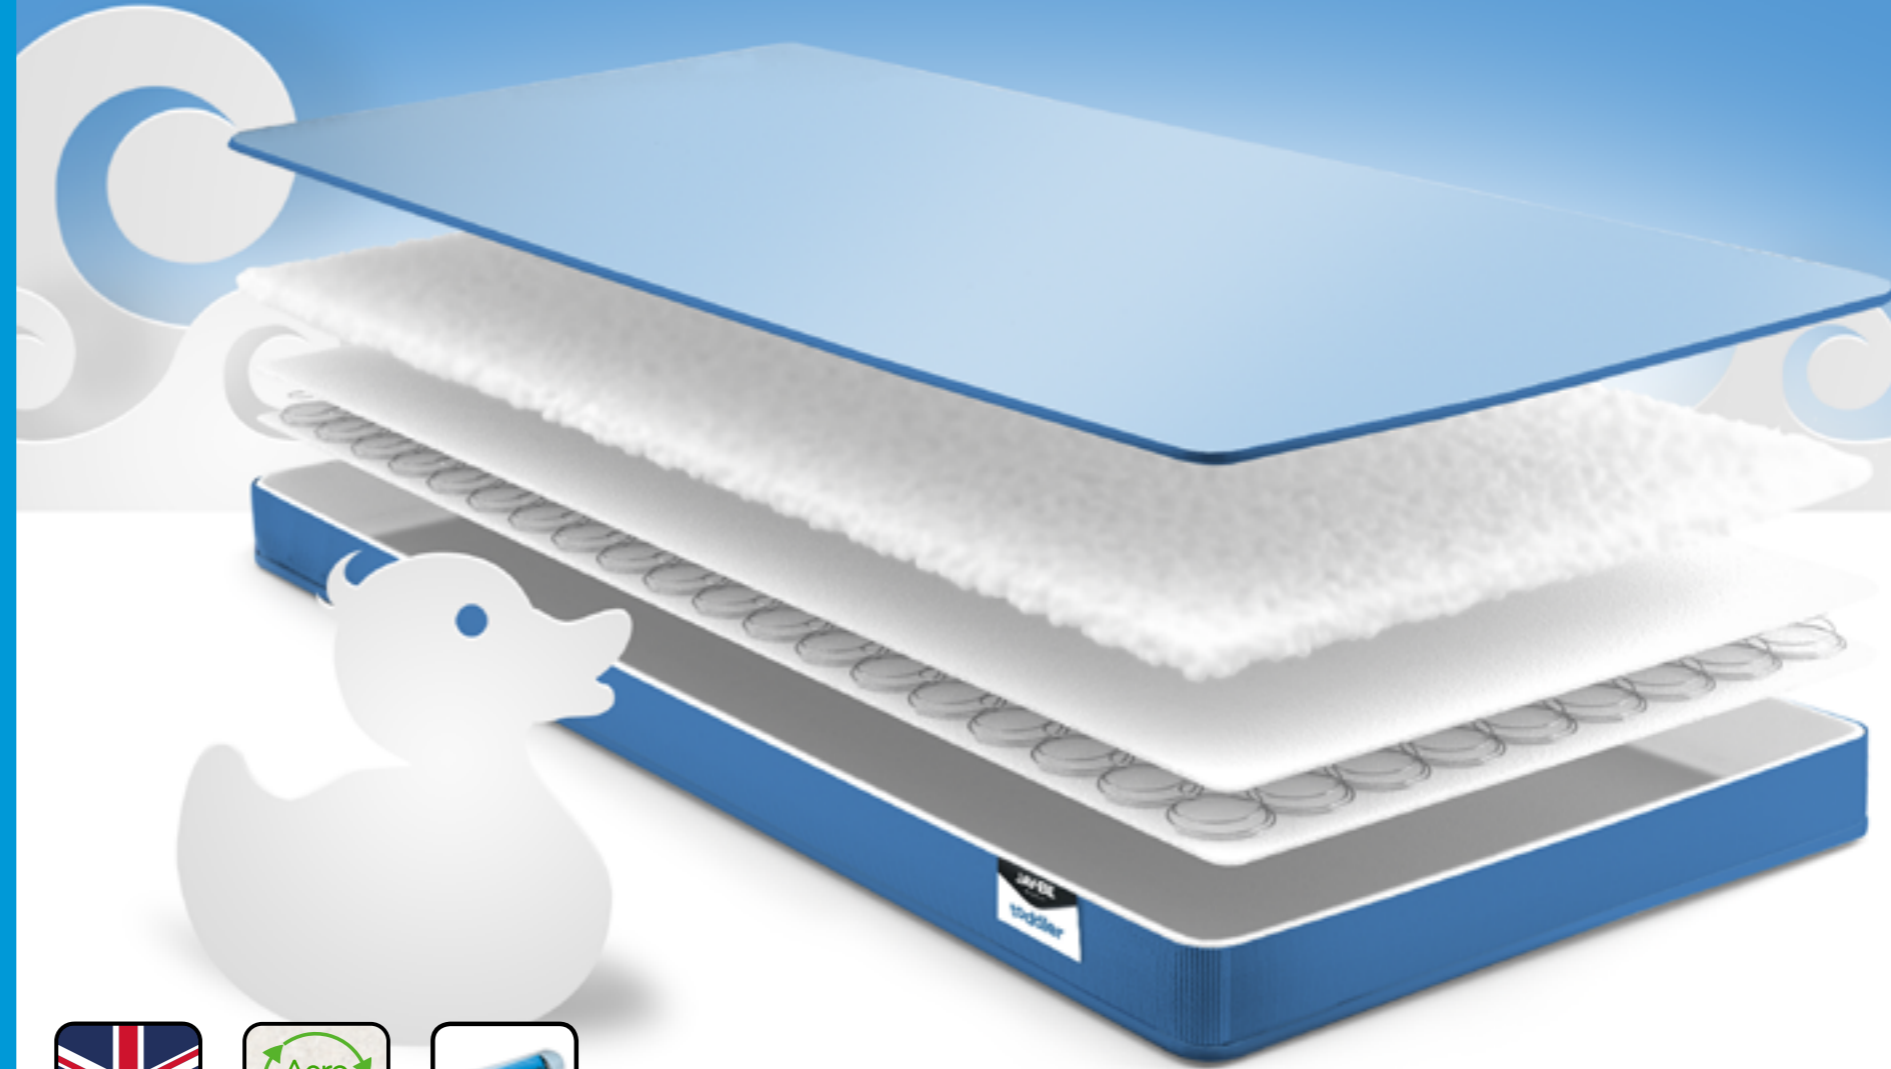

*Mattresses are handmade, so dimensions and weights can vary slightly.

Product is sold subject to JAY-BE® standard terms and conditions. See full terms at jaybe.com/legal

**100%
FoamFree**

As well as being sustainable and 100% recyclable, **Aerofibre is 100% foam free**, so you can be assured that this mattress is completely **free of harmful chemicals and VOC's**.

Designed especially for toddlers who are very clever at finding ways to create mess, the JAY-BE® Toddler Waterproof mattress is a lot more than a fun blue design. It utilises the latest technically enhanced waterproof fabric technology which has anti-bacterial, anti-microbial and anti-fungal properties. It is also easy to wipe clean.

At its core, the JAY-BE® Toddler Waterproof mattress is constructed with a medium firmness spring to offer evenly distributed support while they sleep. The spring is topped with a high-density (HD) insulator pad to prevent spring feel and Aerofibre comfort layers.

As well as offering ultimate practicality, this toddler mattress has Aerofibre comfort layers which are 100% recyclable and engineered from recycled plastic bottles and sustainable fibres. The Aerofibre and spring offers substantial support for growing bones and muscles. Aerofibre is also hypoallergenic and unlike foam has an open cell structure which allows the free flow of air through the mattress, reducing moisture build up and in turn helping to prohibit mould and allergens. As a result, a more comfortable and temperature-controlled sleeping environment is experienced. Jay-Be® Aerofibre is also free from VOC's and harmful chemicals.

All JAY-BE® Toddler mattresses are backed by a five-year manufacturer's guarantee. Roll-packed for your complete convenience.
