**100%  
FoamFree**

As well as being sustainable and 100% recyclable, **Aerofibre is 100% foam free**, so you can be assured that this mattress is completely **free of harmful chemicals and VOC's**.

**JAY-BE**  
Sleep Smart

Made in the UK

Recyclable Aerofibre

Roll packed

Ideal for bunk beds, this comfortable and environmentally conscious mattress is constructed with a medium firmness spring core to provide evenly distributed support for growing bones and muscles.

The spring is topped with a high-density insulator pad to prevent spring feel and breathable Aerofibre comfort layers for durability and comfort.

Engineered from recycled plastic bottles and sustainable fibres, our Aerofibre comfort layers are 100% recyclable and have an open cell structure. Unlike foam, the unique structure of Aerofibre enables the free flow of air through the mattress, actively reducing moisture build up. This helps to regulate body

temperature and maintain an ambient sleeping environment. Jay-Be® Aerofibre is also free from VOC's and harmful chemicals.

For even more cosiness, this Jay-Be® children's mattress is finished in a durable and soft woven fabric. All Jay-Be® Simply Kids mattresses are backed by a five-year manufacturer's guarantee. Roll-packed for your complete convenience.
